

"This volume, a compilation of insightful, thoughtful and highly original explorations, benignly and compassionately subverts the concepts of normal as conventional and of what we often call 'disease' as abnormal. A challenging and much-needed contribution to the psychotherapeutic literature."
- GABOR MATÉ

"A really brilliant resource for therapists - or anyone - who has serious doubts about the set of ideas and ideals that passes itself off as 'normality ... a stunning array of provocations to anyone who thinks there's anything normal about 'normality'"
- ANOUCHKA GROSE

"This beautifully written volume ... should be core reading for anyone interested in the idea that all people are unique individuals who cannot be categorised by conventions."
- ESTELA WELLDON

TABLE OF CONTENTS:

Introduction - **JANE RYAN**

1. The new normal - **TANIA GLYDE**
2. Therapy and hope: are they really normal? - **ANDREW SAMUELS**
