## Principales referencias que reúnen las Evidencias de Investigación sobre la Psicoterapia Psicoanalítica, así como sobre otras estrategias de intervención derivadas o relacionadas con ella.

Compilación elaborada por el Prof. Alejandro Ávila Espada (Catedrático jubilado, Universidad Complutense, Madrid, España) a partir de fuentes documentales y bases de datos de relevancia internacional.

Esta compilación actualizada aporta las principales referencias que dan respuesta a las controversias sobre la científicidad del psicoanálisis, la psicoterapia psicoanalítica, y las psicoterapias dinámicas en general. Hay una extensa tradición de investigación científica de calidad, que viene siendo ignorada por quienes hacen una crítica interesada contra la práctica clínica de orientación psicodinámica. En modo alguno se puede seguir sosteniendo que esta carece de investigación que apoye su efectividad, eficacia y utilidad clínica, y las referencias aquí incluidas son pruebas de ello. Esta compilación de referencias incluye las siguientes secciones:

- I. [Documentación y compilaciones de estudios en páginas web de acceso abierto.](#)
- II. [Principales compilaciones de estudios de investigación relevantes a las modalidades de tratamiento de psicoterapia psicoanalítica publicadas como libro o monografía.](#)
- III. [Meta-análisis, estudios y compilaciones de especial relevancia.](#)
- IV. [Revisiones de líneas de investigación pertinentes a las psicoterapias dinámicas y de orientación psicoanalítica y otros métodos e intervenciones basados en ellas o comparados con ellas.](#)
- V. [Revisiones de líneas de investigación específicas a la intervención con niños/as y adolescentes.](#)
- VI. [Revisiones relevantes sobre las polémicas epistemológicas y metodológicas que afectan a la “Psicoterapia basada en la evidencia” \(y al estatuto científico del psicoanálisis y la psicoterapia psicoanalítica\).](#)
- VII. [Informes y estudios de Coste/Efectividad de las Psicoterapias Psicodinámicas \(y de comparación con otros tratamientos\).](#)
- VIII. [Objetivos de evaluación relevantes a la psicoterapia psicodinámica-relacional y algunos ejemplos de los principales métodos e instrumentos más frecuentemente usados \(Principalmente con adultos\)](#)
- IX. [Otros trabajos de interés](#)

Algunos de los trabajos incluidos podrían ser ubicados en más de un apartado, pero se han evitado, en lo posible, las redundancias.

Los trabajos de revisión y compilación de resultados, y los debates epistemológicos y metodológicos son muy numerosos. En esta compilación solo se ha incluido una selección de los más recientes y/o relevantes de entre los muy numerosos existentes en la amplia trayectoria de estos temas. Enviar sugerencias para la ampliación o mejora de esta compilación, así como de corrección de errores a [avilaespada@gmail.com](mailto:avilaespada@gmail.com)
